TECH TIPS, APP RECOMMENDATIONS
MARILYN KENNEDY, APRIL 11, 2018

Using 2 apps at once on iPad

Open Safari. Lift up from bottom of iPad to see the dock. Press and drag an app upward to the right of the screen. I chose Mail.

Change the size by dragging the righthand screen to the center. Both apps are equal in size now.

Select a paragraph in Safari that you wish to move to Mail. After selecting it, hard press until a movable window appears. Drag that into Mail.

Hard press on pictures and then move the photo to Mail.

When finished, return to the single app (Safari) by dragging the Mail portion off to the right.

iPad keyboard tricks

Show how to create accent marks on words like bon appétit, crème brùlée, entrée, naïve, soufflė, piñata, jalapeño, and façade.

Pull down on keys to get numbers.

Jump around on a document by holding 2 fingers down on the keyboard creating a curser.

Have you looked at your Files app on your iPad?

iCloud Drive, Dropbox

News Explorer App, RSS reader

Available in App Store for $9.99. I have it on both my iMac and MacBook Pro.

It is also made for iOS devices for $4.99.

Has iCloud sync. I've been using it for about 2 weeks.

Memory Clean App, free in App Store

Demonstrate how it works.

Malwarebytes

Not in App Store, free version available, malwarebytes.com

If you upgrade to Premium for $39.99, it has real-time protection.

You get a license key so you can use it on 2 macs.

My premium version found malware yesterday and warned me immediately. Safari was telling me that I needed a Flash update. See article below.
