

## RECOMMENDED GENEALOGY SOFTWARE — Macintosh

### BEST — BEST — BEST — BEST

**Genealogy Pro** ... genealogy program for MacOS X with a FREE 30-day trial. Features an easy to use interface, database with search functions, family tree charting, reports and web publishing facilities.

**Heredis for Mac** ... best selling European genealogy program with innovative features. Data Entry (English) is a strong point and you can synchronize files on several devices including iPhone & iPad.

**MacFamilyTree** ... developed for MacOSX 10.5 Leopard & OSX 10.6 Snow Leopard. Software helps you explore and visualize family histories — display relationships in reports, charts or a 3D Virtual Tree. Synchronize with iCloud, do your online research databases or install on your iPhone or iPad.

**Reunion & ReunionTouch** ... most popular genealogy program for the Macintosh. Reunion has received the highest ratings from MacWorld, MacAddict, and Mac Home Journal magazines. Reunion requires OS 10.3.9 or higher. ReunionTouch supports iPad & iPhone applications.

### BETTER — BETTER — BETTER — BETTER

**Ancestris** ... FREE genealogy program for Windows, Linux and Mac. Multilanguage supported: Totally GEDCOM compliant.

**Ancestral Quest** ... Easy-to-use genealogy software for Windows & Mac. **Ancestral Quest Basics is the free version.** Software has extensive reports, multimedia, and publishing features. Also provides multiple database support, to do lists, powerful merge features, comprehensive syncing with New FamilySearch and more. Notes, sources and scrapbook objects can easily be added. Licensed version names include: PAF, Ancestry Family Tree and Family Tree Heritage.

**iFamily for Mac** ... use with OSX 10.6 Snow Leopard to MacOS 10.13 High Sierra and mouse with more than one button. Software's focus is on the individual person, rather than the typical family unit. Software allows you to see (easily) if an individual has more than 2 parents, more than 1 spouse or the number of siblings they had. Parent-child relationships may be natural (default), step, adopted or foster.

### GOOD — GOOD — GOOD — GOOD

**(FEE) Ancestry** ... <https://www.ancestry.com/>

**(FREE) FamilySearch** ... <https://www.familysearch.org/>

**(FEE) findmypast** ... <http://www.findmypast.com/>

**(FEE) MyHeritage** ... <http://www.myheritage.com/>

**Gramps** ... <https://gramps-project.org> ... the FREE Genealogical Research and Analysis Management Programming System is suitable for both hobbyists and feature-complete for professional genealogists. It is a community project: created, developed and governed by genealogists. It is available for Windows & Mac OS X, BSD.
