## Check for 32-bit Apps

**macOS 10.15 will not run 32-bit apps**

Use System Information

- About This Mac > System Information > Legacy Software

Use 32-bitCheck from Eclecticlight.co (free)

- <https://eclecticlightdotcom.files.wordpress.com/2018/08/32bitcheck16.zip>

---

---

---

---

---

---

---

---

---

---

## Enable Two-Factor Authentication (2FA)

- **Enable 2FA** if it is available.
- Your mobile phone becomes a **trusted device**.
- Logging into a site from a new computer must be authenticated with a code sent to your phone.
- This computer now becomes a **trusted device**.

## Embed a Photo in an Email

- **Open** a new email message on your computer.
- Right click > select **import from iPhone or iPad**.
- Select **Take Photo** or **Scan Documents**
- Use your linked iPhone to **take and save** the photo.

## Tools: Firefox Send

Share files with end-to-end encryption and a link that automatically expires.

1GB (2.5GB with free registration)

<https://send.firefox.com/>

## Tools: pCloud Drive

Encrypted file storage: 10 GB free. 500 GB for \$50/yr.

- Easier to use than Dropbox and better encryption.
- Recover files encrypted by Ransomware using pCloud Rewind.
- Create an account: <https://www.pcloud.com/>  
or: <https://my.pcloud.com/#page=register&invite=X8C3Zf3NNoV>
- Compare pCloud and Dropbox: <https://www.cloudwards.net/pcloud-vs-dropbox/>
- Based in Switzerland: <https://www.pcloud.com/company/about.html>

## Tools: ProtonMail

### Send and receive encrypted Email

- Free (paid versions available).
- Developed at CERN with team members from Caltech, Harvard, and other research institutions.
- Servers are protected by Swiss privacy laws.
- Infrastructure resides underneath 1000 meters of solid rock.
- <https://protonmail.com>

## Create Email Templates

1. **Create a Mailbox** (folder) called Templates.
2. Make sure your mailbox settings save drafts to On My Mac drafts.
3. **Create an email** that you want to use as a template.
4. Close the window and select **Save as Draft**.
5. **Move** the draft message to the Templates folder.
6. To use the template, **open** it and select **Messages > Send Again**.
7. Add your content and **send** it.

Tip: Create the template in Pages, then copy and paste into your template. Insert editable tables, images, and more.
