Q&A

How to restore my Favorites on my menu bar.

- I use Safari and DuckDuck go, also use Safari and not mail. I tried following trouble-shooting steps supplied by Apple Support and my screens did not match what they presented. I still do have a few of the links but most of my stash have disappeared. I also tried Time Machine back up...
 - **Safari:** View > Show Favorites
 - **Mail:** View > Show Favorites Bar

Monterey Tips

[macOS 12 Monterey: The Ars Technica review](#)

Reset to factory specs feature

- Click the Apple Logo in the menu bar > System Preferences.
- Select System Preferences in the menu bar > Erase all contents and Settings.

Quick Notes

1. Choose **System Preferences** from the Mac Menu.
2. Select **Desktop & Screen Saver**.
3. Click **Screen Saver**.
4. Choose the **Hot Corners** button at the bottom right.
5. Select the corner you'd like to use for Quick Note.
6. Choose **Quick Note** from the pull-down menu.
7. Click **OK**.

Bring up a Quick Note using a keyboard shortcut:

1. Go into the **app or location** where you wish to create a Quick Note.
2. Use **Fn + Q** to open a Quick Note.

Save highlighted text from Safari to Quick Note:

1. Go into **Safari**.
2. Copy the **text** you want to highlight.
3. Right-click and select **New Quick Note** or **Add to Quick Note**.

AirPlay to Mac

– Play, present, and share from your iPhone or iPad to your Mac.
