

SOME TIPS AND TRICKS

May 13, 2014

CHANGE AN ICON

Select the origin icon or item in the Finder, and then hit Command+i to summon “Get Info”

Click on the icon in the upper left corner and then hit Command+C to copy the icon to the clipboard, then close out of Get Info

Now select the destination icon or item in the Finder, hit Command+i again, and click the same icon in the upper left corner of the Get

THE EASY WAY TO CHANGE A DESKTOP ICON

- Click on the File on Your Desktop
- Press the Command and “i” keys at the same time.
- Locate an appropriate icon and drag it to the upper right hand corner of the info screen (you should see a plus sign) and release the key.
- Its done. Close the info screen.

CONNECTDESK (IT'S FREE)

Move web pages, documents, pictures, and everything else between your devices in one tap.

CURRENTLY INCLUDES

- iMacs
- Mac Pros
- iPhones
- iPads

APP STORE DESCRIPTION

Seamlessly push websites, documents, pictures, and everything else to any device, any time!

DeskConnect is the missing link between all of your devices. You will never again have to email yourself pictures and documents just so you can open them on a different screen. Reading an article in a web browser? In one click, the article is waiting for you on your iPhone. Imagine pulling up driving directions on your Mac and sending them to the Maps app on your iPhone with one click.

You no longer have to imagine with DeskConnect. And that's just the beginning: you can even use DeskConnect to start phone calls from your Mac.

DeskConnect automatically knows how to share content from your favorite Mac applications. All you need is a single click.

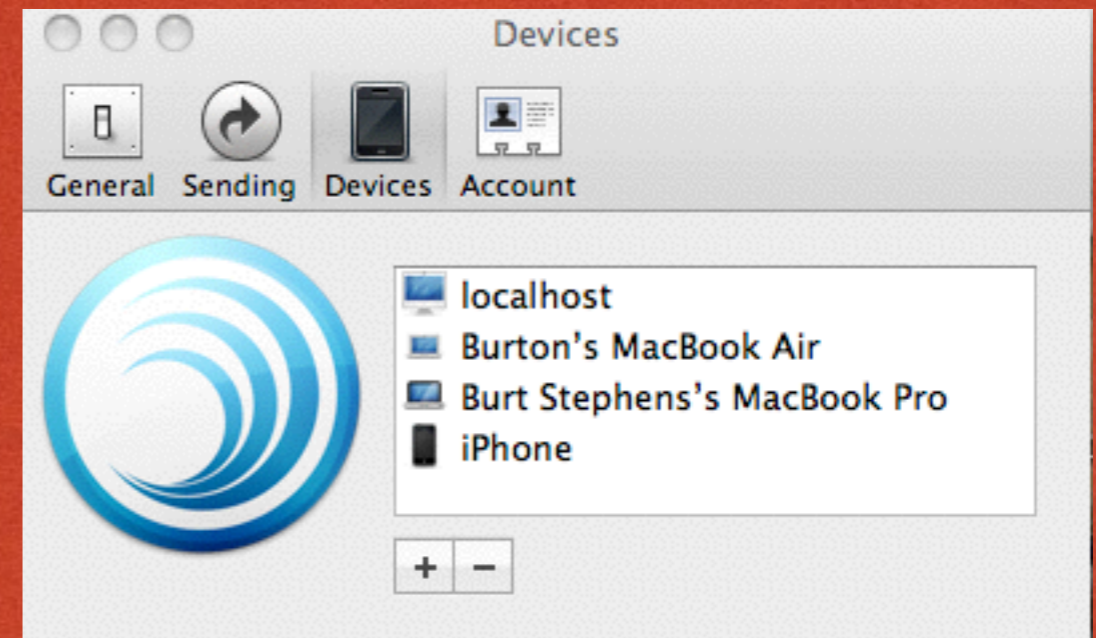

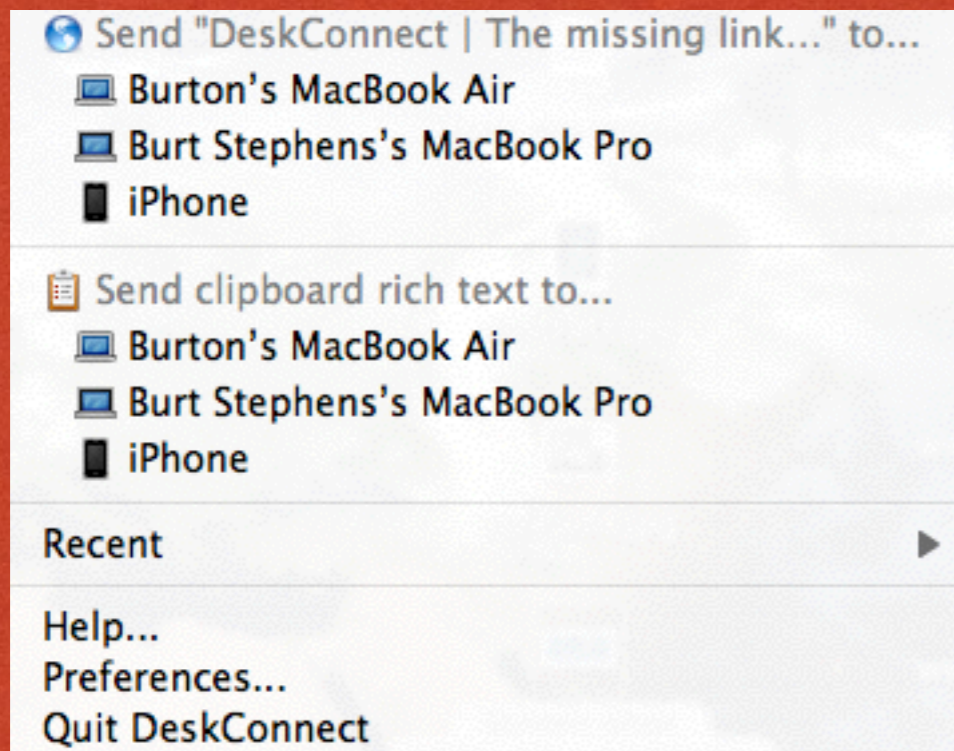

Use DeskConnect to transfer these and more between your devices:

- * Text
- * Images
- * Video
- * Web pages
- * Documents
- * Driving directions
- * Your clipboard
- * Audio

Share as much as you want! DeskConnect has no usage limits, is free to use, and doesn't require a direct Bluetooth or Wi-Fi connection. Your devices can be twenty feet or twenty miles apart.
