# Our Experiences

# How to downgrade to iOS 9.3 on your iPhone or iPad

if iTunes on your Mac or Windows PC doesn't launch automatically, launch it manually. iTunes will detect your device in recovery mode and ask you what you want to do.

## 1. Click Restore on the iTunes popup.

2 Click Restore and Update to confirm.

3 Click Next on the iOS 9.3 Software Updater.

4 Click Agree to accept the Terms and Conditions and start downloading iOS 9.3.

If your device reboots to iOS 10 before the download is complete, simply repeat the steps above and put it back into Recovery Mode. Once the download is complete, iTunes will restore your iPhone, iPad, or iPod touch to iOS 9.3.
