

Connect and Manage Two Computers in the Same Local Network

- Connect the computers using WiFi or ethernet.
- Enable Remote Management on both computers.
 - Open System Settings (Preferences in Monterey or earlier).
 - Select General > Sharing (Ventura).
 - Turn on Remote Management.
 - Click the info button and check all the options
- Use Network in the Finder from either computer to connect to and manage the other computer.

Use an External Display With a Laptop

Mirrored: Run like a desktop with a large display, external keyboard and mouse (or trackpad); keep laptop's lid closed.

Extended: Use the external as the primary and the laptop as an extended display; use external keyboard and mouse; keep laptop's lid open.

- Open System Settings (Preferences in Monterey or earlier).
- Select Displays.
- Select one of the displays (click the icon).
- Choose an option from the "Use as" menu.
- Select the other display.
- Choose an option from the "Use as" menu.
- Click "Advanced" to manage links to Mac or iPad.

ChatGPT

OpenAI

Playground

OpenAI is the research lab behind the development of chatGPT, a natural language processing (NLP) model. **ChatGPT** is designed to generate natural language responses to prompts.

- [OpenAI API](#)
- [Examples - OpenAI API](#)
- Sample Prompts
 - Compare Apple Notes and UpNote.
 - Why should I join OMUG?
 - Tell me a computer joke.
 - Create a computer haiku.
